

# SIKA METAL CONSTRUCTION PRODUCT APPLICATION SOLUTIONS

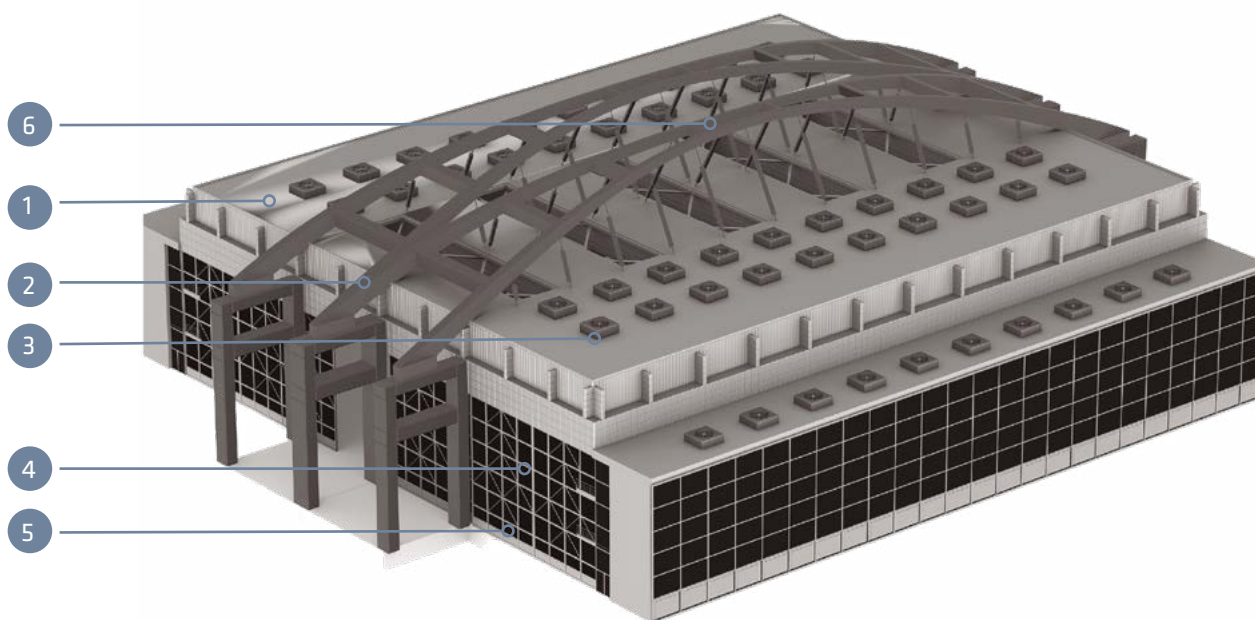

- Multiple products tested and certified to ASTM and Industry standard requirements
- Less working steps in bonding substrates
- Faster assembly processes
- Adhesives with unique combination of long working time with fast curing
- Reduced cleaning and maintenance
- Increased durability

**BUILDING TRUST**

# SIKA PRODUCTS & APPLICATIONS

Sika provides a complete range of high-quality butyl tapes, butyl caulks, polyurethanes, silicones and structural adhesive products for metal building, tank and grain bin construction for on-site or in-factory applications. Sika products are known for their ease of application, durability and performance that can handle the most demanding metal construction applications.

## 1- STANDING ROOF SEALING

Sika products help facilitate panel assembly in a wide variety of climate conditions for multiple substrates with limited pretreatment.

**Products:** Sikaflex®, SikaLastomer®

## 2. BODY STRUCTURE

Two component polyurethane. Sealing and bonding products based on different technologies to meet a large variety of processing needs.

**Products:** Sikaflex®, SikaLastomer®, SikaPower®, SikaFast®

## 3. WINDOW / SKYLIGHT PERIMETER BONDING & SEALING

Large variety of technologies offering fast assembly and high initial tack to ensure no interruption of the manufacturing process.

**Products:** SikaFast®, Sikaflex®, SikaLastomer®

## 4- SANDWICH PANEL BONDING

Superior application properties with varying open times and a broad adhesion range for a permanent bond.

**Products:** SikaForce®, SikaMelt®

## 5. FLOOR BONDING

Complete portfolio capable of providing a water tight seal, fast-curing and excellent noise damping characteristics, ensuring longevity and increased comfort.

**Products:** SikaBond®, SikaFast®, Sikaflex®, SikaForce®

## 6. ROOF BONDING

Large components require long open time adhesives which provide sufficient time for the assembly. At the same time fast-curing speed and strength build up is required to support the manufacturing process.

**Products:** SikaFast®, Sikaflex®, SikaForce®
